## ***Earn Your Eyes- The Cool Concept for Youth Shooting Teams!***

**SightTrax Vision** is excited to offer youth shooting teams the opportunity to have every shooter benefit from having our high quality, multi-colored lens eyewear set, and the best part is they can earn them for free!

How it works: Your team purchases as many of our five or seven-lens eyewear sets as you need. Each five-lens set comes with seven, \$10 raffle tickets and each seven-lens set comes with nine, \$10 raffle tickets. The grand prize for each raffle is a **\$500 Amazon** gift card, a prize anyone would like.

While the retail price of the five-lens set is \$84.95, the youth team price is only \$60. A shooter can sell the included raffle tickets and earn enough money to pay for their eyewear set. The retail price of the seven-lens set is \$104.95; the youth team price is only \$80. Of course, the parents or shooter has the option to pay for the eyewear set and keep any unsold raffle tickets as their own entries. It's their choice.

Each raffle ticket has a perforated stub on which the purchaser writes their name and telephone number. Within whatever sales time frame set by the club, the shooters turn in the money and the ticket stubs. The club's raffle manager can either mail the stubs to us or just create a list of the names and telephone numbers and email them to us.

We conduct a drawing every time we reach 300 sets sold or on the last day of each quarter which gives the ticket seller a firm drawing date to tell a purchaser. However, ticket stubs or an entry list must be returned by the 25th day of the last month of each quarter to participate in that drawing. If less than 300 tickets or a multiple thereof were sold in that quarter, then the drawing will be delayed one month but not more than one month regardless of number of tickets sold.

To participate in the **SightTrax Vision, Earn Your Eyes** raffle program, just fill in the participation registration form found at [www.SightTraxVision.com](http://www.SightTraxVision.com). We will send you an acceptance email with full information. Once your team is registered,

just check the box on the order form requesting raffle tickets to be included with your eyewear sets. The appropriate number of tickets will be included with each eyewear set.

## ***Sport Vision Eyewear System***

SightTrax Sports Vision was founded by Jim Tyner, an active trap shooter, longtime supporter of youth clay target shooting and founder of ShotStop, Inc. (Shot-Stop.com), the world's leading supplier of ballistic fabric for shot curtains that keep lead shot from leaving gun club property and being deposited in neighboring properties or sensitive habitat.

Working with gun clubs nationwide, he talks with youth team coaches across the country and they made him aware of the quandary that they face trying to obtain reasonably priced, multi-colored lens, shooting eyewear sets for their young shooters. They expressed concern that the majority of their shooters were wearing sunglasses, standard prescription glasses, safety glasses or cheap, single color shooting glasses, putting them at a physical and often, psychological disadvantage to shooters able or willing to invest in the more expensive, multi-lens "big-name" glasses.

He decided to create a quality eyewear set at an economical price that would be suitable for new shooters that would be durable and give all shooters the benefit of color contrast target acquisition packaged in a way they could be proud of.

Our SightTrax Vision, multi-lens eyewear sets are the result of those efforts. Since their introduction in 2024, they have been widely accepted in the marketplace by youth teams nationwide. As a coach looking for an economical solution to equip your team members with the benefits of color contrast enhancing shooting glasses with the highest degree of impact resistance, our SightTrax Vision eyewear sets are a good investment in your team members vision safety.

SightTrax Vision lenses are made from ANSI Z87.1 Polycarbonate and have excellent impact resistance as demonstrated in this picture of a lens which we shot with a 12gauge, 7.5, 1200 fps shell at only 20 yards. Note that none of the 29 pellets penetrated the plastic nor did the plastic crack or shatter.

**Check out Our Earn Your Eyes Program on the Reverse and see how your entire team can be outfitted for free.**
